Basis Of Consolidation

The unaudited condensed consolidated financial statements include the financial statements of the Company and its subsidiaries for the three months ended 31 March 2019. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

When the Company has, directly or indirectly, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group. All intra-group income and expenses relating to transactions between members of the Group are eliminated in full on consolidation.

3. Revenue

Revenue represents services rendered to customers less any discounts and invoiced trading sales of spare parts.

MANAGEMENT DISCUSSION AND ANALYSIS

Business review

The Group is a leading automotive service provider in Singapore. We have over 15 years of experience in the passenger car service industry, and offer a comprehensive range of passenger car services including (i) maintenance and repair services; (ii) modification, tuning and grooming services; and (iii) provision of extended warranty program. We have the capability to maintain and repair a wide range of brands of passenger cars in Singapore and are equipped with diagnostic equipment for carrying out such services. Maintenance and repair services continue to be a key focus of the Group, contributing approximately 76.3% and 82.4% of total revenue for the three months ended 31 March 2019 and 2018, respectively. We modify and tune mainly luxury and ultra-luxury passenger cars, providing services ranging from aesthetic modifications including installing bodykits, to performance modifications including lowering the suspension of passenger cars and replacing the engine control unit. We also sell passenger car spare parts and accessories in Singapore and export to other countries, such as Malaysia, Indonesia, United Kingdom, PRC and Thailand. We have continued to expand our range of tuning products and services to meet new customer demands and this segment has realised an increase of 38.7% in revenue from approximately S\$0.7 million for the three months ended 31 March 2018 to approximately S\$0.9 million for the three months ended 31 March 2019.

Our management is confident of the Group's strong performance in our key market Singapore due to the Group's competitive strengths which include: (i) we are a leading automotive service provider in Singapore with comprehensive service offerings and the capability to repair a wide range of brands of passenger cars; (ii) we collaborate with established car dealers in Singapore and have strong relationships with car tuning parts suppliers; (iii) we focus our modification, tuning and grooming services on luxury and ultra-luxury passenger cars, which has strengthened our brand name; (iv) we focus on providing high quality customer service and stringent quality control; and (v) we have an experienced senior management team who is supported by a team of talented and well-trained technicians.

In 2018, the Group planned for new development strategies such as new energy car "car sharing" and "new retail sales". Leveraging on the dual momentum of industrial development and capital operation and taking advantage of the "Internet +" trend, we seek to create new growth driver for our business in relation to car related industries such as car sales, car sharing and core spare parts. The new businesses will provide a prime opportunity for the Group to diversify the Group's scope of business, broaden the Group's sources of income and achieve better return to the shareholders.

On 27 July 2018, World Brilliant Investments Limited, an indirect wholly-owned subsidiary of the Company has established a direct subsidiary namely 深圳嗒程科技有限公司 (Shenzhen Dacheng Technology Limited*). It primarily engages in businesses such as the timeshare car rental and long-term car rental. It is committed to developing the "Internet +" car sharing and rental market in PRC. As at 31 March 2019, the subsidiary has contributed approximately S\$0.4 million revenue for the Group.

On 3 August 2018, Dragon Hero International Limited, an indirect wholly-owned subsidiary of the Company has established a direct subsidiary namely 鄭州車主角汽車銷售有限公司 (Zhengzhou Car Zhujiiao Car Sales Limited*). With an innovative concept of platform operation, it provides its customers with an innovative car rental and sales integrated service platform which covers car sales, car financing service, car rental service and car insurance service.

Outlook

2018 is a year of many changes for the Singapore passenger car market. Since February 2018, the Singapore government implemented a zero car and motorcycle growth rate policy. The new policy will result in a number of changes in the market, including an expected fall of total registered vehicles in Singapore, and increased retention of vehicles via renewed certificates of entitlements (COEs).

In addition, the market for taxi transportation services have reportedly doubled since private hire and self-operated car services have begun operating in Singapore. The total number of chauffeur-driven private-hire car is about 1.5 times that of taxis, according to the numbers released by the Land Transport Authority of Singapore in 2017. The private-hire car industry is expected to grow and evolve further. This presents an opportunity for the Group to increase its customer base, with private car owners that increasingly require maintenance and repair services. The Group aims to continue to increase our customer base in the highly fragmented passenger car maintenance and repair market, by enhancing our servicing capacity, market reputation and service quality. The Group will pursue the following key business strategies: (i) continue to strengthen our leading market position in Singapore and expand our servicing capacity and customer base; (ii) continue to increase the brands of car tuning parts that we offer; (iii) further strengthen our brand, operational efficiency and sales and marketing efforts, and improve our customer service quality; and (iv) continue to attract, train and retain skilled employees to support our future growth and expansion.

Since September 2017, the Group began operating additional units of workshops at our new Sin Ming Autocity service centre, a new 8 storey complex located across our existing Sin Ming Service Centre. The new workshops include accident repair facilities such as aluminium welding centre, spray painting preparation area, a section for Chromax low emission spray painting activities, low bake oven and wheels alignment system. This is to cater for the Group's expansion of its services to include car bodywork involving panel beating and spray painting which we subcontracted previously. This expansion allowed the Group to qualify as an approved reporting centre ("ARC") and authorised repairer ("Authorised Repairer") for insurance companies. An insured who is involved in any car accident, will report the accident to the insurance company's ARC within 24 hours or by the next working day. The Group has been appointed by several insurance companies, as an Authorised Repairer, where we render repair services in respect of the insured vehicles. Further, the Group has entered into an agreement with an international insurance company and offer warranty programme ("Extended Warranty Programme") to both new and used passenger cars. Under the Extended Warranty Programme, the Group provides authorised automobile repair and maintenance services for the insured customers and receive a warranty revenue from the programme. The Extended Warranty Programme allows the Group to provide supplemental services to its existing customers and expand its customer base.

Moving forward, the Group will focus on maintaining its leading position in the Singapore passenger car market. We shall continue to expand our service and product offerings as customer demands and trends shift. The management will continue to forge stronger bonds with our customers, suppliers and working partners to continue to provide the premier passenger car services in the Singapore passenger car market. Looking ahead and analysing the broader market development, with the global push towards electrification of transport, the global electric car market will likely transition from early development to mass market adoption in the next 10 to 20 years.

In Singapore, the government has already implemented policies and incentives such as the new vehicular emissions scheme where only full-electric cars will qualify for the top-tier rebate of S\$20,000 under this new scheme. Other initiatives include the launch of the first electric vehicle sharing service in December 2017 with 80 cars and 32 charging stations across the island. On 31 July 2018, the Land Transport Authority (LTA) has granted a full-fledged Taxi Service Operator Licence to operate at least 800 electric taxis within four years of receiving the licence, or by 31 July 2022. Currently, Grab operates the largest electric and hybrid vehicle fleet in South East Asia and it is to bring in 200 new electric vehicles which will be rolled out in Singapore from early 2019. Adoption rate in Singapore will largely be affected by government policies and incentives and availability of charging stations across the island. In preparation of the market developments, the Group will continue to pursue technological advancement in both repair equipment and new vehicle engine type to ensure that our technicians continuously upgrade their skills and technical knowledge in order for them to be able to service a wide range of brands of passenger cars which drives the future development of the car maintenance and repair market in Singapore.

Financial review

Revenue

Revenue of the Group increased by approximately S\$1.7 million or approximately 45.6% from approximately S\$3.8 million for the three months ended 31 March 2018 to approximately S\$5.5 million for the three months ended 31 March 2019. This is mainly due to increases in both our maintenance and repair services and modification, tuning and grooming services and trading of spare parts segments. This is mainly a result of the increased capacity and service offerings with the new Sin Ming Autocity service centre. One of our new subsidiaries in PRC has reported a revenue of approximately S\$0.4 million for the three months ended 31 March 2019 has also contributed to the revenue increase.

Loss for the period

The decrease in loss for the period was mainly due to an increase in gross profit and gross profit margin from both our businesses in Singapore and PRC market.

COMPLIANCE WITH CORPORATE GOVERNANCE CODE

The Company is committed to achieving high standards of corporate governance. The Directors believe that sound and reasonable corporate governance practices are essential for the continuing growth of the Group and for safeguarding and maximising shareholders' interests.

Pursuant to code provision A.2 of the Corporate Governance Code contained in Appendix 15 of the GEM Listing Rules (the "CG Code"), the roles of chairman and chief executive officer should be separate and should not be performed by the same individual. However, we do not have a separate chairman and chief executive officer and Mr. YAN Jianqiang is currently a co-chairman and the chief executive officer of the Group. The Board believes that vesting the roles of both co-chairman and chief executive officer in the same person has the benefit of ensuring the consistent leadership within the Group and enables more effective and efficient overall strategic planning of the Group. The Board considers that the balance of power and authority for the present arrangement will not be impaired and this structure will enable the Company to make and implement decisions promptly and effectively. The Board will continue to review and consider splitting the roles of chairman of the Board and chief executive officer of the Company at a time when it is appropriate and suitable by taking into account the circumstances of the Group as a whole.
